All bulls suitable for heifers/cows

# WELCOME...

## to the 2025 Bull Sale.

It is with great pleasure we present this outstanding draft of bulls. The depth, performance and phenotype of this year's draft, is our best to date. By concentrating on sires with moderate to lower birth weights and high growth (curve benders), we have assembled a draft that fifty out of the eighty-three lots, are suitable for heifers/cows. This gives you, the breeder, greater diversity when selecting genetics for your herds. According to the DNA profiles analysed through Neogen, progeny from these animals will be born easily, with rapid growth. A strong focus on carcass performance will also assist you in attaining first-class MSA grading and lucrative price premiums. Whilst never losing sight of genuine cattlemanship, we believe genomic testing is the greatest way forward into the future. By sampling calves at birth, we can accelerate breeding proficiency and utilise this data to enhance decisions, in making greater on-farm profits.

Throughout this and previous catalogues, we make mention (many times), of the sires' lineage to matriarch females. As cattlemen, we find this one of the most important and fundamental elements to a successful breeding programme. Prominent elite matrons, with inherent doing ability and generations of production history gain this title. They are the backbone of many of the great herds and show up repeatedly in pedigrees. We also make mention as to how specific trait selection, (such as selecting for positive fats to assist fertility rates in drier times) can help you to increase on farm profitability. Please use these descriptions as a guide to assist in specific sire selection for your herds.

On the market front, opportunity abounds both internationally and domestically. According to the latest MLA outlook, confidence is strong, with stable prices boosting optimism. The national herd is expected to increase by 6%, with a larger retention of heifers and the purchase of more steers. With the USA at near record lows, a global stock shortage, and our national herd entering the rebuild phase - exciting times are ahead.

We believe we are one big rain event (in the south) from the beef industry taking off to a new level. Those who maintain stringent breeding programmes and select sires from modern performance orientated herds, will gain the most. By embracing technology and utilising EBV data, a producer can gain up to \$50 per calf produced, creating a significant advantage in bull selection.

One of the most rewarding elements of seedstock breeding, is witnessing the extraordinary success, Bowman genetics are having on the industry. It has been fantastic to get around sales, on property visits or speaking directly with clients as to how well their sires are performing. From viewing sale topping steers, to receiving videos of magnificent future breeding females, our aim is to have the most profitable producers. Also being one of the true grass-fed operations in the country, the feedback on how well the bulls grow out is exceptional. We pride ourselves on having the best after sales service and up to date breeding advice, with many clients being with us since inception. We look forward to presenting this magnificent draft on sale day. If we can be any further assistance, please don't hesitate to reach out.

Kind Regards,

Glenn Bowman

# SALE INFORMATION...

## INSPECTION

Bulls may be inspected prior to the sale by contacting vendors or selling agents. Cattle available for inspection from 10am on sale day.

## REBATE

Licensed agents must attend the sale in person or purchase lots through Auctions Plus to qualify for the 3% rebate.

## GST

GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price, plus GST.

## AUCTIONS PLUS

Auctions Plus will be available on sale day. Please register 24hrs before the sale.

## HEALTH QA

The bulls are ready for immediate use.

We have treated them as follows:

- Double Vaccinated with 7 in 1
- Double Vaccinated with Vibrovax
- All bulls comply with immune ready guidelines
- Double Vaccinated with Pestiguard
- DNA tested to prove they are not PI (Persistently Infected) with Pestivirus.
- Bowman Performance Genetics are EU accredited.
- Bowman Performance Genetics has a J-BAS 6 certification under the supervision of the Maffra Veterinary Centre. All bulls are clear to enter Victoria, New South Wales, Tasmania, South Australia, Western Australia, Queensland and Northern Territory.

## INSURANCE

Bulls are like any other piece of valuable farm equipment and it is wise to insure them, especially for the first six months of working life. There will be a number of options available through Elders Insurance at the venue.

## GENOMIX AND SINGLE STEP BREEDPLAN

The EBV's on each bull incorporate their genomic analysis. Referred to as "Single Step", the inclusion of genomic analysis reduces the pedigree dependence of the Breedplan model. Single Step tends to

spread the data on each bull and it is possible for full brothers (flush brothers) to have very different post Single Step analysis EBV's, despite their raw data being quite similar.

## PARENTAGE ASSURED

Our entire herd has been DNA verified to both the sire and the dam. We are one of the few studs in Australia that can accurately assure parentage.

## SEMEN RIGHTS

All bulls are sold with 80% semen rights attached. In doing this we leave the great majority of any potential semen revenue in the buyer's hands. However by keeping a 20% share, it gives us, as a breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties. It should be noted that instances of bulls becoming big revenue spinners from semen sales are rare. By keeping the vendor involved, the 80/20 semen ownership split is designed to give the purchaser the greatest opportunity for semen sales on the top sires in the sale. Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale. Under all circumstances, the vendor retains the right to collect up to 200 straws of semen from any bull in the sale for use within herd. Any semen collection would be at vendor's expense and purchaser's convenience.

## DISCLAIMER

Every care has been taken during the compilation of the catalogue to ensure accuracy of information supplied. However, no responsibility will be accepted for any errors that may have occurred.

## FERTILITY

All bulls have been semen tested by Ian Moreland of Studcare Genetics.

## CATERING

Please join us for complimentary morning tea, lunch and after sale drinks.

## FREE FREIGHT

Free freight across Victoria. For freight assistance beyond Victoria please contact us.

## **BULL HANDLING**

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, certainly not other bulls.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good condition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems can occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over-fat.

## **REGISTRATION**

Ownership transfer of the bulls will be registered by the vendors with Angus Australia, provided accurate transferee details are supplied with the Buyer's Instruction Form. With this form, please be sure to provide: NLIS number, Angus Herd ID (if applicable) and specify if the purchasing herd is EU accredited.

## **FEEDING AND MANAGEMENT**

The bulls have received pasture and hay only throughout their lives. At no stage have any of the bulls received grain or substitute of any description.

The bulls have been handled with dogs, UTV's, horses, utilities and on foot. None of the bulls have had their feet trimmed.

## **WARRANTY**

The vendor warrants that:

1. Bulls are fertile and capable of natural service within 6 months of date to the purchaser ("Warranty Period"); and

The vendor will either:

1. Provide a satisfactory replacement or
2. Provide a credit for use at the next Bowman Performance Genetics Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus the salvage value:

Where:

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and

correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.

The purchaser acknowledges that the purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls, which may apart from this clause be binding on the Seller are excluded.

The seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

## **HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)**

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risks associated with cattle handling.

**VISITORS ENTER THE CATTLE PENS  
AT THEIR OWN RISK  
CHILDREN MUST NOT ENTER THE YARDS**

People entering the yards are at risk of injury. Be especially alert for bulls fighting and if one is playful with you, do not respond by patting his head. A playful nudge can be quite harmful. We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not overcrowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily. Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

**Can't make the sale?  
Log onto AuctionsPlus to bid from  
anywhere on your phone, tablet or desktop.**

- 1 REGISTER ONLINE**  
Simply click 'Sign Up' to begin your free registration. To register as a buyer for livestock, you will need to provide us with a few more details.
- 2 COMPLETE BUYER INDUCTION**  
The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.
- 3 VIEW CATALOGUE**  
Photos, videos, pedigrees and other information will be available in the online catalogue.
- 4 ENTER AUCTION**  
Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.
- 5 AUTO BID**  
Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.
- 6 CONTACT SELLING AGENT**  
If successful, contact selling agent directly after the sale to arrange payment.
- 7 DELIVERY**  
Arrange transport of livestock at your expense.

## IT'S A SIGN OF BETTER PRODUCTIVITY AND ANIMAL HEALTH

'Immune Ready' is a guideline for the care of sale cattle. It helps protect cattle in the preparation, transport and arrival post sale.

### FOR BUYERS

- It reduces the risk of disease in purchased cattle
- It improves farm biosecurity
- It improves animal health and welfare

### FOR SELLERS

- It prepares your cattle for potential disease challenges
- It allows you to promote and sell premium cattle
- It helps safeguard against disease and improve productivity

Comstock is as thick as they come and one of the highest-use bulls in Australia in 2024. If you're looking to increase carcase content, moderate mature cow height and add calving ease, these sons will be the go-to sires. A whopping +16.5 EMA and Leg Angle structural scores, easily rank him in the top 1% of the breed. His sons are easy doing and as docile as they come. One of the first chances to secure progeny in Australia this Autumn. Top 2% Angus Breeding Index.

Maternal strength is one of the most important traits at Bowman Performance Genetics. Generations of donors sit behind So Right, tracing back to the best cow ever bred at Knowla, in Designer V96. Add the consistency of his sire, Baldrige Alternative E125 and you have an extremely powerful pedigree. Phenotypically, he displays a tremendous spring and depth of rib, smooth shoulder, free flowing gait and massive hind quarter. Top 15% Angus Breeding Index.

After inspecting many outstanding Stellar sons, it was a must to use this latest exciting sire to come out of the USA. Packed with tremendous phenotype, wide-based and deep-bodied, Resilient not only has the looks but exhibits breed leading data to match. He was the record selling bull in the Sitz Fall sale at \$165,000 and hails from one of the strongest maternal lines in the Sitz herd. A true curve-bender with superb calving ease, high growth, first-class structural scores culminating in an Angus Breeding Index in the Top 5%.

The Australian powerhouse Millah Murrah Paratrooper P15 has shattered every record in the breed. Firstly, by selling for \$160,000, and then going on to sell 43 sons for an incredible average of \$46,990. Following in his footsteps, his first son Rocket Man R38 also broke the Australian record at \$280,000, with many progeny setting the highest averages at bull sales. Providing early outstanding progeny at Bowman Performance Genetics, Paratrooper was used heavily in the 2022/2023 and 2024 joinings. Domestic Index top 8%.

Nectar is the go-to bull for outstanding foot structure, docility, gestation length and EMA near the top of the breed. Complementing this, he derives from one of the best females at Millah Murrah, Prue H113. With sons selling to \$160,000 at the recent Millah Murrah sale, progeny are now in hot demand around the country!

Quarterback derives from a prolific stud producing cow family. We were keen to add the maternal power of Barunah K304, with Bowman Performance Genetics being the underbidder at the 2020 Murdeduke Matrons Sale. His calves are docile with brilliant data sets behind them. Quarterback is now one of the highest use bulls around the country, leading the field (top 10% or better) in Gestation Length, Scrotal Size, Rib and Rump Fat and IMF.

38 Special combines outstanding low birth weight, calving ease, growth and first-class structural scores. His first season at Bowman Performance Genetics saw a 100% calving rate on both heifers and cows. This true curve bending sire will add strong tops, great depth of rib and muscle expression backed by the prolific Isabel Y69 as his dam. 38 Special ranks in the Top 12% of the breed for the Angus Breeding Index Value!

An outstanding son of the 2016 highest selling bull, Millah Murrah Loch Up L133 (\$85,000). N47 is the calving ease specialist (top 15%) and was chosen as the "pick" bull of the "N" draft. Originating from the prolific Abigail family and boasting a Milk figure in the top 12%, Nashville is breeding the house down with feminine replacement females and thick, meaty, powerful sons. After now finishing his fourth joining season, he has maintained terrific shape, doing ability and flawless feet and structure. Nashville now has over 90 sons producing in commercial herds throughout the country and amassed in excess of \$500,000 in sales.

We chose S101 on the back of his dam Wilcoola N0167, who was our pick of the heifers at the Witherswood dispersal. Tracing back to the magnificent Wilcoola Z31, it was a must to secure this female line, known for producing top shelf sires. The addition of Joe Canada gives a slightly different mix to this pedigree, with the power and doing ability of Paratrooper. Another fine example of curve-bending low birth, easy calving, and high growth performance.

 A descendant of the great Dream Y301, Phoenix is a powerful bull, displaying a beautiful thick topline, deep flank and smooth front end. His sire LD Capitalist, has had one of the greatest influences in the USA including many sale-toppers and the ability to breed on through numerous progeny. I inspected Capitalist on three separate tours to the USA, and every time he passed with flying colours, displaying magnificent feet and the extra muscle content this line is known for.

A superb data set, with almost all of the essentials on the right side of the graph. The birth to growth spread, carcass and structural data place U28 near the top of the breed. Maternally, the prolific Yankee Queen G257 is still going strong at 14 years of age, with over 100 progeny to date. Top 5% Calving Ease, top 20% 400 Day Weight, top 9% Carcass Weight, top 8% Claw Set. **Used in stud. Suitable for heifers/cows.**

An impressive son of donor Flower N34, who was purchased as part of the original four year flushing programme from Millah Murrah. It's no coincidence that many of the bulls in the draft are descendants of matriarchs. Maternal strength is one of the most important fundamentals to cattle breeding. Top 18% EMA, top 13% Rib Fat, top 8% Rump Fat.

Wow! Every dimension of U10 oozes quality. It's no wonder when you look at his pedigree. A three-quarter brother to the high selling \$240,000 Millah Murrah Rocket Man R38. The heavy fleshing, enormously thick topline, butt shape and deep flank make this sire one you should have marked down. Top 8% Gestation Length, top 12% EMA, top 8% Angus Breeding Index. **Suitable for heifers/cows.**

Prue 70 produced an impressive Nashville son, selling to CT Ferguson, Longford in the 2023 sale. This calving ease sire, like most of the Paratroopers, is chocked full of red meat and strides out magnificently. Top 13% Gestation Length, top 20% Birth Weight and Scrotal Size. **Suitable for heifers/cows.**

Buyers option to opt out of disclosing personal information to Angus Australia  
 If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.  
 I, the buyer of animals with the following ident(s) \_\_\_\_\_ (name) do not consent to Angus Australia using my name and phone number for the purposes of effecting a change of registration of the animal(s) I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.  
 Authorised Name: \_\_\_\_\_ Signature: \_\_\_\_\_  
 Date: \_\_\_\_\_  
 Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350

**Privacy Information**  
 In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

**Parent Verification Suffixes**  
 The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.  
 PV: both parents have been verified by DNA.  
 SV: the sire has been verified by DNA.  
 DV: the dam has been verified by DNA.  
 #: DNA verification has not been conducted.  
 E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

# THANK YOU...

The sires presented here today are several years in the making, with many moving parts to the operation. A successful business is only as good at the people behind it and to this end we would like to thank everyone involved.

Bowman Performance Genetics would also like to thank all buyers and underbidders. We look forward to following your progress.
