SPRINGWATERS

POLL DORSET STUD EST. 1979

Welcome to our 23rd Annual Poll Dorset Ram Sale

220 Poll Dorset rams

Inspection from 10:30am ◦ Online auction 1pm

Welcome to the 2026 Springwaters Poll Dorset ram sale. We have 220 rams catalogued for your inspection, representing some new genetics to our flock as well as some extensions of the bloodlines our regular clients are familiar with.

For the first time, our entire draft of rams are all the same age, being August/September 2025 born. The decision to move away from two stud lambings a year has been made in an attempt to simplify the management involved in our stud breeding program. As a result, the rams present very evenly, taking away the environmental differences and age differences that come with having different aged rams catalogued together. It's not a huge change to you as a buyer – the ewe flock is exactly the same – and last year the sale was made up of over 70% spring drop rams; this year its 100%.

2026 has been a much better year for sheep producers, here locally and in the majority of the southern parts of New South Wales. We have seen fantastic prices, coupled with much improved seasonal conditions. We believe the rams we have available this year are going to produce lambs that can really capitalise on the prices available going forward. Widely sought after in any store market, our rams mature and grow rapidly for early sucker production and have the ability to grow out into heavy lambs.

This years draft are all Genomically DNA tested, as is every animal in our stud flock. They all come with a set of ASBV's to give you as buyers as many tools as you need to help selection. With an ever increasing number of technologies available to us, we still strive to produce rams with type, early maturity, muscle and consistency.

Thank you for taking an interest in our sheep,
Dane and Lisa, Dennis and Jo-Anne

STUD TRANSFERS AND SEMEN SHARES

Springwaters retain the right to collect semen for in-flock use from all rams sold. Semen will be collected at our expense and the buyer's convenience.

Any ram requiring transfer to a stud must have a minimum purchase price of \$5000. If you wish to register a ram outside of lots 1 to 14 please chat with Dane or Lisa to confirm transfer eligibility prior to purchase.

ANIMAL HEALTH

All Springwaters sale rams were drenched with Trifecta and given a 6-in-1 SB12 on 15th September 2026. Springwaters is OJD MN2(V) and Brucellosis accredited free.

DNA PARENT VERIFICATION AND GENOMICS

All rams in the 2026 Springwaters Poll Dorset sale have had a Genomic 50k test and DNA parent verification carried out. On the buyers end, it adds certainty to our pedigree and breeding, while also adds some accuracy to ASBV's.

Fat Depth	EMA	Index
5.72	32.21	1268.52

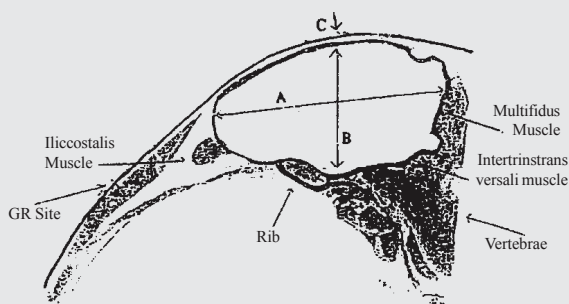

Scanning for performance traits in animals has become a significant on-farm measuring tool over the last 10 years within the stud industry.

Australian STOCKSCAN Services P/L scanners assess sheep at around 12 months of age for the following:

- Weight (LW)
- Eye Muscle Width (A)
- Eye Muscle Depth (B)
- Fat Measurement (C)

Eye Muscle Area (EMA) is calculated using the eye muscle width and eye muscle depth measurements.

The meat index is based on the Eye Muscle Width, Eye Muscle Depth and Fat Measurement with an adjustment for the age of the sheep.

SIRE SUMMARY

BASALT – SW220091

SW210129

SW230035

BASALT – SW220091

He hasn't got the number of sons represented verse previous years due to a slow start to his joining last March. Expect larger drafts of sons in the years to come. With big capacity and volume, Basalt possesses a lot of sire appeal and class for a ram with so much power. His sons are strong boned with a lot of muscle and length. Basalt has a seriously impressive show resume, being awarded Grand Champion Ram at the ASWS in Bendigo, Supreme Exhibit at the NSW Dorset Championships and the Australasian Dorsets Championships as well as the Ram of the Year for 2023.

IVADENE 230105

Ivadene 230105 was purchased as an introduced sire in 2024. We love the philosophy of his breeders, who aim to breed sheep with high data performance that still maintain the phenotypic traits we think are so important. We think a lot of the star young ram he has sired at Lot 2 – and he has bred us a retained sire this year as well.

LSK230023 + LSK230263

Both these sires were purchased from the Kellys, who also own and operate the Ivadene stud. Again, we were attracted to the balanced approach they take to breeding their sheep and thought these rams could certainly offer us a lot in terms of a little bit of genetic diversity.

SW240023

A retained young sire by an A.I. ram we used in Warburn 220470. What is impressive about his lineup of sons this year is that he was used in a syndicate of four 7-month-old ram lambs in our March 2025 joining. He has had an incredible ratio of lambs born to rams represented in our sale team. We are expecting big things from him in the coming years when his line up of rams are the result of more targeted, larger scale single sire joinings.

YENTRAC 220002

We purchased this ram in 2023 from the Yentrac stud in Victoria. He is an outcross sire for us, but the genetics are very familiar as he has a Springwaters ram as his grand sire. We love his moderate frame and outstanding muscle expression. He has thrown great carcase shape into his offspring with sons represented right from the top of the catalogue.

SW210129

This is a ram that has had large drafts of sons catalogued for the last few years and will not be a stranger to clients who have purchased off us recently. He has great muscle expression through the loin and hindquarter with a huge amount of body width and depth.

SW210770

A home-bred sire who is fitting into our breeding program very well. With softness, body depth and shape, we really love the bone in this ram and its evident in his progeny. This will be his last drop of rams, but his genetics will continue to have an impression through a very impressive son we have retained in SW250622. His hindquarter has to be seen to be believed.

SW230035

This ram was sold in our 2024 sale to Pete Ballantyne in South Australia. We have used him extensively through A.I., primarily for his extreme body depth and fleshing. We love his thickness and strong Dorsets type. He is another leading son of SW Goldie to be used in our flock and has sired a couple of excellent sons in this draft, including the star Lot 3.

A real star. He's the best combination of phenotype and ASBV data we've ever offered. Great balance, outlook and structure with wonderful hindquarters shape. We purchased his father to breed sons we could use heavily; he's certainly one and have used him as a lamb already. With Guinness on the dams side, his maternal pedigree is from the heart of our flock.
