LYNWOOD BORDER LEICESTERS

This seasons rams embody the balance, structure, and consistency we strive for at Lynwood Border Leicesters, making them an excellent addition to any flock. The following is an outline of the selection criteria we utilise to meet our breeding objectives.

Raw Data Measurements: Aid buyers in the selection of rams as indicators of potential carcass shape, muscling and growth in progeny. We analyse and compare these measurements to maintain consistency and ensure progress in this area.

Visual Selection: We place high emphasis on the physical traits of our rams such as sound structure, balanced confirmation and even fleece. This ensures longevity and adaptability in any seasonal conditions.

Pedigree Data: We have extensive pedigree and breeding data on all our stud sheep. We are able to reference this data when selecting sires at joining to unlock their genetic potential in future progeny.

The rams underwent scanning and weighing conducted by Trevor Pearce Scanning Services on September 9th, 2024, measuring Yearling Weight (YWT), Muscle Depth (YEMD), and Fat Score (YCF).

Ram Husbandry

- Rams have been vet checked by Wellington Veterinary Surgery prior to sale day
