Terry Tarbotton 0428 932 703

Brad McDonnell 0455 442 702

Cameron Harris 0429 680 334

Tim Spicer 0427 812 194

Deane Allen 0427 421 306

SALE INFORMATION

FERTILITY

We endeavour to ensure that all bulls are capable of service, structurally sound and in satisfactory working condition at time of sale. All bulls were semen tested on 30/3/2024 and are guaranteed fertile for 12 months from the date of sale. No warranty is given for any bull, which becomes infertile or incapable of natural service due to illness, injury or disease. If a bull should prove infertile, the purchaser must notify the vendor in writing accompanied by a veterinary certificate of infertility. The vendor retains the right to obtain independent veterinarian confirmation of any claim.

CONDITIONS OF SALE

The bidder/buyer number system will be used. The conditions of sale are those laid down and displayed by the selling agents. Please register with the selling agents on sale day. Please note that all animals are sold on a GST exclusive basis. GST of 10% will be added to the purchase price.

NLIS

Intending purchasers please bring your PIC (NLIS) number for ownership transfer.

TRANSFERS

All bulls will be transferred by Angus Australia.

TELEPHONE BIDDING

The sale venue offers excellent reception on the Telstra, Optus and Vodafone networks.

AUCTIONSPLUS

All lots will be available for online bidding via AuctionsPlus. For more information on how to participate visit <http://www.auctionsplus.com.au>.

INSURANCE

It is suggested that buyers insure their purchases for full cover upon the fall of the hammer. Cattle remaining with the vendor will do so at the purchaser's own risk.

INJECTIONS

Bulls are Zoetis STAR BREEDER program certified to provide maximal protection against reproductive diseases. This means they have been ear-notched and tested not persistently infected with BVDV (Pestivirus), and have received two injections each of Pestigard, Ultravac 7in1 and Vibrovax. Bulls have also been injected with vitamin B12 plus selenium.

JOHNE'S BEEF ASSURANCE SCORE (J-BAS)

The Gandy Angus herd is maintained at the J-BAS 8 level.

ATTENTION ALL PURCHASERS

Please ensure you complete a purchaser's instruction slip available from the registration desk. Verbal instructions cannot be accepted.

DISCLAIMER

All reasonable care has been taken to ensure that the information provided in this catalogue is correct. However neither the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this catalogue.

PV: both parents have been verified by DNA, SV: the sire has been verified by DNA,

DV: the dam has been verified by DNA, #: DNA verification has not been conducted

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively

ATTENTION BUYER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

- 7 Birth Weight: 35kgs

Notes: Suitable for mating heifers

UNDERSTANDING THE INFORMATION

- 1 PV - Parent Verified: both parents verified by DNA. SV - Sire Verified: sire verified by DNA.
- 2 The Accuracy of the EBV, the higher the percentage the more accurate the EBV.
- 3 The Percentile Band of the breed the animal sits in for that trait whole population.
- 4 WKG23U127 has a 400W of +109 at 79% accuracy which is in the top 10% of the breed for 400 day weight.
- 5 Traits Observed: measurements we have taken.
- 6 Genomics: DNA testing that has been conducted.
- 7 Actual birth weight of the animal.
- 8 Genetic Status
- 9 Registration Status: all catalogue Herd Book Registered (HBR).

4 PERCENTILES, HOW TO USE

Using the percentiles that any trait sits within allows you to quickly identify exactly where an animal ranks within the breed. The 50th percentile is breed average.

1 means the animal is in top 1 percent of the breed.

For majority of traits it is considered desirable to rank closer to the top 1 percent of the breed, but it is not always the case i.e. MCW where you are wanting a moderate cow.

CARING FOR YOUR NEW BULL

Respect your bulls, and handle them quietly, walk them rather than rushing them. Treat them with care and in a gentle manner and they will do likewise to you. A bull leaving Diamond Tree is leaving the security of the mob and will arrive in a strange environment at the purchaser's property. Unload him and make sure he has a steer or cow as a companion straight away, if you can't put him out into the mob immediately.

A young bull can move in with older bulls and settle in well, but remember, being the youngest, he will get the last of any feed available, due to the pecking order. The paddock needs to be reasonably large so he can keep away from the others and find adequate feed.

Young bulls are still growing fast and need enough feed to maintain their growth pattern and be able to settle with the cows quickly and efficiently.

Diamond Tree bulls are all injected with 7in1 vaccine (for protection against leptospirosis, pulpy kidney disease, tetanus, blackleg, black disease and malignant oedema) twice at 3 months of age, at a six weekly interval and then they receive a booster as a yearling. A booster injection of Ultravac 7in1 must be given every 12 months to maintain immunity.

When the bull is finished with the cows for the season we suggest he should be drenched and injected with vitamin B12 with selenium. Regular injections of B12 with selenium and drenching will help ensure the ongoing health of your bull. These bulls will handle approximately 50 cows on their own, or can go in with 100 cows after a good artificial insemination programme.

Diamond Tree bulls are used to being handled with vehicles, four wheeler motorbikes and by stockman on foot. The fences are electrified and the bulls treat them with respect.

You must always keep a regular watch over your bull when he is out with the cows, as accidents can happen. Every day he is not working will cost you dollars. During the mating season, boundary riding should include the observation of bulling cows, and the bull serving. This is easy because the cows will group together, have full bags of milk and will be followed by male calves.

If the bull does not behave in a normal manner serving, he must be replaced immediately. If a cow has been served before the observer arrives, the bull may not repeat the performance. It has been noted that bulls can simply scratch their penis on dry manure on a cow's backside, infection can set in and a very large and alarming looking appendage can form. If treated quickly and efficiently this can be remedied.

Our veterinary advice is that a suspected broken penis is often just an infection and if observed straight away can be treated and cured.

When the season is finished, the bull should be drenched and put away with enough feed in front of him. Adequate feed will help stop fighting and help the bull settle into the bull group.

Always be considerate to your bull and handle him with respect. You will find you will receive this respect back from him.
