WELCOME...

to the 2024 Special Spring Bull Sale.

What a difference 12 months makes in the beef industry! Optimism abounds, with the important Eastern Young Cattle indicator currently sitting at close to 700 cents per kilo, almost double the lows of last October. It appears many of the forecasters got it right, with increasing opportunities into the future. With many pockets still holding on for the spring break, markets are surging ahead on the back of increasing processor throughput, and an insatiable appetite for our product in overseas export destinations.

Exciting times are ahead, with China back to pre-covid demand - reinstating almost all of the export processor licenses - and the U.S. in the depths of a massive herd rebuild. Australia, too, has announced last week the commencement of a rebuild after the triggering of the increased female slaughter rate. When the season breaks, agents are predicting prices to further increase on the back of this typical supply and demand scenario.

On the home front we continue to supply our clients with the best available genetics globally. Hundreds of hours of research and cattlemanship goes into designing an animal, that will increase producer profit margins. Our \$index indices are constantly on the rise, whilst adding more muscle mass and improving carcass traits. We feel it's imperative to keep the accelerator to the floor when it comes to the science of breeding cattle.

The real value of genomics and Estimated Breeding Value selection is seen first-hand, in our own 1200 strong female breeding herd, along with professional finishing buyers. These buyers gravitate towards cattle

they know will perform with solid pedigree and data behind them. Traits such as calving ease, structure, docility and positive fats make our job easier on farm, whilst growth weights and carcass traits assure our cattle meet the lucrative MSA grading targets. Looking to the future, buyers will be able to select pens of steers, based on EBV's through genomics. I'm told we are not far away from a TSU ear notch being taken from commercial cattle being sold, that will display potential growth rates, docility and likely carcass performance potential.

We believe in a bull with enhanced science – backed by generations of cattlemanship – to increase your profits. When buying a Bowman Bull, you are utilising proven genetics that deliver a first-class result.

SALE INFORMATION...

INSPECTION

Bulls may be inspected prior to the sale by contacting vendors or selling agents. Cattle available for inspection from 10am on sale day.

REBATE

Licensed agents must attend the sale in person or purchase lots through Auctions Plus to qualify for the 3% rebate.

GST

GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price, plus GST.

AUCTIONS PLUS

Auctions Plus will be available on sale day. Please register 24hrs before the sale.

HEALTH QA

The bulls are ready for immediate use.

We have treated them as follows:

- Double Vaccinated with 7 in 1
- Double Vaccinated with Vibrovax
- All bulls comply with immune ready guidelines
- Double Vaccinated with Pestiguard
- DNA tested to prove they are not PI (Persistently Infected) with Pestivirus.
- Bowman Performance Genetics are EU accredited.
- Bowman Performance Genetics has a J-BAS 6 certification under the supervision of the Maffra Veterinary Centre. All bulls are clear to enter Victoria, New South Wales, Tasmania, South Australia, Western Australia, Queensland and Northern Territory.

INSURANCE

Bulls are like any other piece of valuable farm equipment and it is wise to insure them, especially for the first six months of working life. There will be a number of options available through Elders Insurance at the venue.

GENOMICS AND SINGLE STEP BREEDPLAN

The EBV's on each bull incorporate their genomic analysis. Referred to as "Single Step", the inclusion of genomic analysis reduces the pedigree dependence

of the Breedplan model. Single Step tends to spread the data on each bull and it is possible for full brothers (flush brothers) to have very different post Single Step analysis EBV's, despite their raw data being quite similar.

SEMEN RIGHTS

All bulls are sold with 80% semen rights attached. In doing this we leave the great majority of any potential semen revenue in the buyer's hands. However by keeping a 20% share, it gives us, as a breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties. It should be noted that instances of bulls becoming big revenue spinners from semen sales are rare. By keeping the vendor involved, the 80/20 semen ownership split is designed to give the purchaser the greatest opportunity for semen sales on the top sires in the sale. Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale. Under all circumstances, the vendor retains the right to collect up to 200 straws of semen from any bull in the sale for use within herd. Any semen collection would be at vendor's expense and purchaser's convenience.

DISCLAIMER

Every care has been taken during the compilation of the catalogue to ensure accuracy of information supplied. However, no responsibility will be accepted for any errors that may have occurred.

FERTILITY

All bulls have been semen tested by Ian Moreland of Studcare Genetics.

CATERING

Please join us for complimentary morning tea, lunch and after sale drinks.

BULL HANDLING

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, certainly not other bulls.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good condition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems can occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over-fat.

REGISTRATION

Ownership transfer of the bulls will be registered by the vendors with Angus Australia, provided accurate transferee details are supplied with the Buyer's Instruction Form. With this form, please be sure to provide: NLIS number, Angus Herd ID (if applicable) and specify if the purchasing herd is EU accredited.

FEEDING AND MANAGEMENT

The bulls have received pasture and hay only throughout their lives. At no stage have any of the bulls received grain or substitute of any description.

The bulls have been handled with dogs, UTV's, horses, utilities and on foot. None of the bulls have had their feet trimmed.

WARRANTY

The vendor warrants that:

1. Bulls are fertile and capable of natural service within 6 months of date to the purchaser ("Warranty Period"); and

The vendor will either:

1. Provide a satisfactory replacement or
2. Provide a credit for use at the next Bowman Performance Genetics Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus the salvage value:

Where:

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has

suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.

The purchaser acknowledges that the purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls, which may apart from this clause be binding on the Seller are excluded.

The seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risks associated with cattle handling.

**VISITORS ENTER THE CATTLE PENS
AT THEIR OWN RISK
CHILDREN MUST NOT ENTER THE YARDS**

People entering the yards are at risk of injury. Be especially alert for bulls fighting and if one is playful with you, do not respond by patting his head. A playful nudge can be quite harmful. We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not overcrowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily.

Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

**Can't make the sale?
Log onto AuctionsPlus to bid from
anywhere on your phone, tablet or desktop.**

- 1 REGISTER ONLINE**
Simply click 'Sign Up' to begin your free registration. To register as a buyer for livestock, you will need to provide us with a few more details.
- 2 COMPLETE BUYER INDUCTION**
The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.
- 3 VIEW CATALOGUE**
Photos, videos, pedigrees and other information will be available in the online catalogue.
- 4 ENTER AUCTION**
Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.
- 5 AUTO BID**
Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.
- 6 CONTACT SELLING AGENT**
If successful, contact selling agent directly after the sale to arrange payment.
- 7 DELIVERY**
Arrange transport of livestock at your expense.

IT'S A SIGN OF BETTER PRODUCTIVITY AND ANIMAL HEALTH

'Immune Ready' is a guideline for the care of sale cattle. It helps protect cattle in the preparation, transport and arrival post sale.

FOR BUYERS

- It reduces the risk of disease in purchased cattle
- It improves farm biosecurity
- It improves animal health and welfare

FOR SELLERS

- It prepares your cattle for potential disease challenges
- It allows you to promote and sell premium cattle
- It helps safeguard against disease and improve productivity

Millah Murrah Paratrooper P15^{PV}

The Australian powerhouse Millah Murrah Paratrooper P15 has shattered every record in the breed. Firstly, by selling for \$160,000, and then going on to sell 43 sons for an incredible average of \$46,990. Following in his footsteps, his first son Rocket Man R38 also broke the Australian record at \$280,000, with many progeny setting the highest averages at bull sales. Providing early outstanding progeny at Bowman Performance Genetics, Paratrooper was used heavily in the 2022/2023 and 2024 joinings. Domestic Index top 8%.

Millah Murrah Nectar N334^{PV}

Nectar is the go-to bull for outstanding foot structure, docility, gestation length and EMA near the top of the breed. Complementing this, he derives from one of the best females at Millah Murrah, Prue H113. With sons selling to \$160,000 at the recent Millah Murrah sale, progeny are now in hot demand around the country! Gestation length top 6%.

Murdeduke Quarterback Q011^{PV}

Quarterback derives from a prolific stud producing cow family. We were keen to add the maternal power of Barunah K304, with Bowman Performance Genetics being the underbidder at the 2020 Murdeduke Matrons Sale. His calves are docile with brilliant data sets behind them. Quarterback is now one of the highest use bulls around the country, leading the field (top 10% or better) in Gestation Length, Scrotal Size and IMF.

Baldrige 38 Special^{PV}

38 Special combines outstanding low birth weight, calving ease, growth and first-class structural scores. His first season at Bowman Performance Genetics saw a 100% calving rate on both heifers and cows. This true curve bending sire will add strong tops, great depth of rib and muscle expression backed by the prolific Isabel Y69 as his dam. 38 Special ranks in the top 9% of the breed for the Angus Breeding Index Value!

It's hard to find a better combination in the breed for feet and docility than the Beast Mode sons. Add one of the most prolific cows in Australia to this pedigree, Yankee Queen G257 grossing over \$120,000 in sales, made Ridgeland an easy choice for stud duties. Purchased by T & JA Christensen, Glengarry for \$8000. Top 4% Growth.

Radar traces back to an outstanding cow at Millah Murrah, Flower F126 and was the 2022 sale topper, selling for \$20,000 to Smith Graziers, Tambo Crossing. The paternal side is just as strong, with arguably the best cow in the angus breed, Isabel Y69 as the grand dam. He displays superb curve bending birth-to-growth spread, carcass data, milk and structural scores, with an Angus Breeding Index in the top 14%.

Bowman Nashville N47^{SV}

An outstanding son of the 2016 highest selling bull, Millah Murrah Loch Up L133 (\$85,000). N47 is the calving ease specialist and was chosen as the “pick” bull of the “N” draft. Originating from the prolific Abigail family and boasting a Milk figure in the top 7%, Nashville is breeding the house down with feminine replacement females and thick, meaty, powerful sons. After now finishing his fourth joining season, he has maintained terrific shape, doing ability and flawless feet and structure. Nashville now has over 90 sons producing in commercial herds throughout the country and amassed in excess of \$500,000 in sales.

Bowman Queenslander Q91^{PV}

With the superb doing ability and meat content of Chisum 255, we decided to retain a son to follow on this prepotent bloodline. Queenslander hails from the prolific M1 donor and maintains a pure Millah Murrah bloodline. With ‘through the roof’ fertility top 5%, he also adds breed leading foot structure and milk.

T55 has been ranked at the top of the male calves born for 2022. A fantastic culmination of pedigree, performance and phenotype, this sire is an absolute nugget. Another heifers first calf holding an angus royalty pedigree, with the great Princess W38 and Isabel Y69 and being a Nashville grandson who has amassed well over \$500,000 in sales. Top 14% Calving Ease, top 2% EMA, top 3% Angus Breeding Index. **Used in Stud. Suitable for heifers/cows.**

The consistency of Q91s' ET flush has been sensational, with his full brother breeding the house down for the Mahr family, Bengworden. His dam Abigail M1 was the pick of that year's first calvers, who then went on to be a prolific donor for us and still producing exceptional calves at eight years of age. Another one for the bullock producers! Top 9% 600 Day Weight, top 13% Scrotal Size.

ET brother to Lot 11. The Quarterbacks are as long as a train and will add significant IMF to any mating outcome. Ela L6 entered the donor pen, after raising one of the best calves every year. We always judge a cow on the calf she raises! If you're looking to shorten your calving interval, this is your sire. Top 7% Gestation Length, top 8% Milk. **Suitable for heifers/cows.**

One of the last chances to secure an Exclusive son! T162 derives from the multiple generation donor Princess family, showing strength of pedigree and doing ability. They are prolific and we would expect the same breeding performance with this sire. I visited his recently deceased grandsire, LD Capitalist 316, on three occasions in the US. He passed every inspection with flying colours and has seen heavy use in many leading herds. Top 5% Gestation Length, top 19% Scrotal Size, top 13% Docility.

The Renos were a hit in the Autumn, breeding right up there with the best of the AI sires. He has grown into a tremendous sire for Smith Graziers, Tambo Crossing. The New Zealand bred Flower L22 has been one of our best, producing many sires at the front end of the catalogue and leaving a wonderful legacy of daughters behind. T264 maintains exceptional data across the board and would be a fantastic multi-purpose sire. Top 8% Angus Breeding Index. **Suitable for heifers/cows.**

One of the best calving ease options in the catalogue, T109 is the ideal mating choice for heifers. He is as good as you'll find anywhere in the breed! The maternal strength on the dam side is superb, combining Isabel Y69 and Jane L37. Top 3% Calving Ease, top 2% Gestation Length and Birth Weight. **Suitable for heifers/cows.**

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.
PV : both parents have been verified by DNA.
SV : the sire has been verified by DNA.
DV : the dam has been verified by DNA.
: DNA verification has not been conducted.
E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

Hereford Reference Sires

1	HUNTER LAKES LION HEART L110 (AI) (ET) (PP) Calved: 10/04/2015 Tattoo: L110 ID No: HLKL110	ALLENDALE VAGABOND A74 (AI) (P) ALLENDALE WATERHOUSE D1 (PP) ALLENDALE MARLINE X185 (P) DAYS ROBIN HOOD H38 (AI) (ET) (PP) ALLENDALE KENWORTH 2 (P) ALLENDALE FANCY U5 (AI) (P) ALLENDALE FANCY 248 (AI) (P) SOUTH BUKALONG WALKER 6 (AI) (P) SOUTH BUKALONG WALLACE 2 (P) SOUTH BUKALONG VICTORIA 152 (P) HUNTER LAKES FANCY F7 (AI) (P) DEBARRY EDEN (PP) ALLENDALE FANCY D24 (AI) (P) ALLENDALE FANCY A7 (AI) (ET) (P)
INDEX VALUES	An absolute powerhouse of the Hereford breed, Lion Heart was purchased as the \$65,000AUD top priced bull of the 2017 national sale at Dubbo, NSW. A homozygous poll that combines performance, phenotype and pedigree, from the iconic Allendale Fancy cow family. With an IMF (Intra Muscular Fat) score almost three times the breed average, a trait leader in gestation length, 200-day weight and scrotal size, Lion Heart has the ability to transfer this phenomenal data through to his progeny. His calves display the same quiet, easy disposition, outstanding looks and cosmetics. A trait leader for Gestation Length, he is a true industry leader! Purchaser: \$.....

THANK YOU...

We would like to express our sincere gratitude to the buyers, underbidders, long-standing clients and those new to our program. Our goal is for you to be the most profitable producers in the beef industry. Thank you for all your support. We look forward to following the progress of our genetics in your herds and throughout the beef supply chain.
