

PAXTON STUD

8TH ANNUAL ON PROPERTY SALE

PAXTON BORDER LEICESTER STUD

Thursday, 10th October 2024 at 4pm

"Broadview" 942 Broadview Road, Western Flat

Martin and Kirsty Harvey welcome you to their 8th annual on property sale of Paxton Border Leicester Stud.

In 2009 we purchased the Wongary Border Leicester Stud from Robert & Diana Hooper. We have endeavoured to continue with Robert's breeding philosophies.

The Paxton Studs prides itself on structurally sound, easy care paddock reared rams. The stud maintains a focus on fertile, high growth, well-muscled, quality wool cutting sires.

At the conclusion of the sale we invite you to join us for refreshments.

Rams will be penned by 2pm with sale commencing at 4pm.

Paxton Stud have MN2 vaccinated status in the OJD Market Assurance Plan (S396) and is Ovine Brucellosis Accredited (Flock no. 470)

Robin Steen P: 0428 838 195
Ray Jaensch P: 0439 870 682

We offer a rebate of 3% to outside agents introduced in writing 24 hours prior to sale. No delivery will be permitted before the end of the sale unless by prior arrangement.

Paxton Stud would like to acknowledge the following sponsors:

Rabobank

SuperBorders is the brand name for Border Leicester Rams that are of high genetic merit for a first cross production system. The official SuperBorder yellow ear tags allow SuperBorder rams to be easily identified.

To qualify as a SuperBorder a Border Leicester ram must be above the 50th percentile for the breed based on the BLX index (Border Leicester Cross Index). The 50th percentile index value is calculated based on the 15th of August LAMBPLAN run each year. It is used to determine SuperBorder rams for that selling season. The BLX Index has been developed for production systems using Border Leicester sires crossed to Merino dams to produce first cross progeny. BLX balances maintaining mature size with significant improvements in early growth and reproduction. A higher BLX index targets animals that are more profitable in this production system.

The cut off for the 2023 drop is 128.7. Everything on or over this figure qualifies as a SuperBorder.

Not all rams sold by SuperBorder members are necessarily SuperBorder quality, but are bred by committed, registered breeders striving for genetic gain. SuperBorder rams must be structurally sound and of good breed type.

The SuperBorders group is made up of a number of studs across 5 states who work together in meeting market requirements for objectively measured maternal genetics in the Australian Lamb Industry. SuperBorders members are industry leaders with longstanding involvement in research, trials and industry resource flocks.

First cross lambs sired by 100% SuperBorder rams may be sold as 'Bred from SuperBorders'. Special yellow pen cards and SuperBorders ear tags are available to identify these animals when sold in physical sales. Virtual yellow sale cards are also available for SuperBorders progeny sold on online sale platforms. Please speak with us if you would like either of these marketing materials.

Agriculture is woven through **OUR DNA**

Our people have a deep knowledge of agriculture right across the supply chain, and with many being from the land, they don't just understand farming, they live and breathe it.

Regulin improves the reproductive performance of sheep.
It's that simple.

REGULIN®
MORE LAMBS WHEN YOU WANT THEM

Fewer dry ewes, more twins and a tighter lambing window all add up to more lambs. **20% more.***

If you join early and your ewes are in good condition, Regulin can improve your production and profits this year.

If not this year, when?

*Average increase in paddock trials. Individual results may vary. Works in all breeds of sheep. Regulin is licenced for use in ewes and rams in Australia by Ceva Animal Health Pty Ltd, 11 Moores Road, Glenorie NSW 2157 ACN 002 692 426

Border Leicester Cross (BLX)

Summary of the BLX index

- The BLX index targets improvement of a system where Border Leicester rams are joined to Merino dams to produce first cross progeny, with females used as ewes joined to terminal sire rams.
- BLX balances maintaining mature size with significant improvements in early growth and reproduction.
- Measuring adult weight in ewes makes BLX more effective at simultaneously maintaining mature size and improving key profit traits.

Production system outline

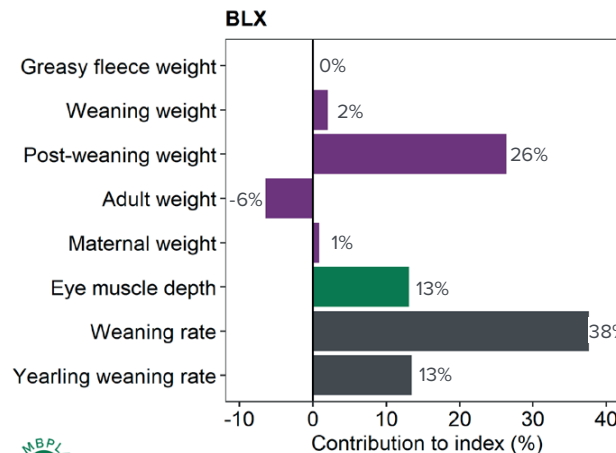

This production system is for a first cross operation where maternal sires are joined to Merino dams, with the first cross female offspring then used in prime lamb systems joined to terminal sire rams. The BLX index focuses on increasing growth, carcass eye muscle depth and number of lambs weaned. A small amount of emphasis on increasing fleece weight is also included.

Trait contributions

Figure 1 illustrates which traits are in the index and how much they contribute to the overall balance of the index in the top 10% of current Border Leicester progeny. The longer the bar, the greater the impact on the index, and the greater impact on the profitability of the production system.

In the BLX production system, growth and reproduction contribute most to the index, with smaller contributions from carcass eye muscle depth and maternal weaning weight.

Figure 1: The traits in the BLX index and how they contribute to the overall balance of the index in the top 10% of current Border Leicester progeny

© Sheep Genetics 2022

Updates to the BLX Index

Number of Lambs Weaned (NLW) has been replaced by an improved ASBV called Weaning Rate (WR). This new ASBV has been included in the BLX index.

Sheep Genetics has released a new trait that measures reproductive performance called Weaning Rate (WR). WR combines the traits of Conception (CON), Litter Size (LS) and Ewe Rearing Ability (ERA) into a single ASBV for selection. From 2022 onwards WR has replaced the previous trait of Number of Lambs Weaned (NLW) and has been included in the BLX index.

As a result of the introduction and inclusion of WR in the BLX index there have been changes in the percentiles for the analysis. You may notice that the 50th percentile for the analysis has changed compared to last year.

This ram sale season it will be important to use the percentile band table to re-benchmark what the percentiles are to assist with ram purchasing decisions.

To access the current percentile bands table please use the QR code below of the left. For further information on Weaning Rate please use the QR code on the right and refer to page 4 of the Sheep Genetics 2022 Analysis Enhancement Documentation.

MANAGEMENT OF YOUR NEW RAM

Paxton Stud has done their best to present their annual draft of structurally sound rams for your selection.

All rams from "Broadview" are Brucellosis free, MN2 status and OJD vaccinated. Recently, they have been back-lined, drenched with triguard and 6 in 1 vaccinated.

All rams have received three pellets of Regulin immediately prior to sale.

We may suggest you insure your ram for the next 6 months. He will be more susceptible to injury, death and loss of use in this time than any other period of his life.

Try and avoid putting new rams with old rams prior to mating. Border Leicester rams will perform better shorn at time of mating. Fly strike and grass seeds will be minimised.

From here on this management is your concern and will influence what his productive life will be in your breeding program.

We wish you every success with your purchase.
