Measured Performance Data

Australian Sheep Breeding Values (ASBV's)

YCFW	Yearling Clean Fleece Weight (kg)	Rams with higher YCFW ASBV's will produce progeny that will cut more wool.
YFD	Yearling Fibre Diameter (µm)	Rams with more negative YFD ASBV's will produce progeny which are finer.
YWT	Yearling Weight (kg)	Rams with more positive YWT ASBV's will produce progeny that grow quicker and are heavier at a certain age.
YFAT	Yearling Fat Depth (mm)	Rams with more positive YFAT ASBV's will produce progeny that have more subcutaneous fat, which improves reproduction rates and meat quality.
YEMD	Yearling Eye Muscle Depth (mm)	Rams with more positive YEMD ASBV's will produce progeny that have more muscle, independent of weight, and a higher lean meat yield.
EBWR	Early Breech Wrinkle score	Rams with more negative ASBV's will produce progeny with less breech wrinkle and, in general, less body wrinkle as well.

Selection Indexes

DP+	Dual Purpose Plus Index – ranks animals on their ability to produce merinos for dual purpose operations. The index is aimed at producers whose majority of seep income comes from sheep sales. It is for self-replacing merino flocks that do not keep their wethers and also join a portion of their ewes to terminal sires for lamb production.
MP+	Merino Production Plus Index – ranks animals on their ability to produce progeny for a fine wool operation that has significant surplus sheep sales. The index is aimed at producers whose sheep income is a balance of both wool and surplus sheep sales. It is for self-replacing merino flocks who do not keep their wethers to produce wool.
FP+	Fibre Production Plus Index – ranks animals on their ability to produce progeny for a fine wool operation that retains a proportion of wethers. The index is aimed at producers whose majority of income is from the wool clip with a focus on wool quality. There is a focus on improving fleece weight and fibre diameter and also includes staple strength, worm resistance and reproduction.

Merino Link Sire Evaluation

The indexes reported are the DP+; MP+; FP+ and WP+. The first 3 of these indexes are the same as MERINOSELECT indexes of that name but account for the fact that direct reproduction records are not currently collected as part of standard sire evaluation trials. The WP+ index is unique to AMSEA. Further information about Indexes is available earlier in this report and at www.merinosuperiorsires.com.au/resources. The average value for all indexes is 100.

Indexes are calculated using all available data from both the ewe and wether progeny.

- Brochures
- Advertising
- Signage
- Print and distribution
- 20 years industry experience
- Efficient turnaround

"Effort, efficient and effective - are words I would use to describe Liana and her business. We have been working together for the last 10 years. They have been ten years of significant growth for us and this would not have happened without her professional, industry knowledge approach. Liana is now an essential part of our business success." M and J Corkhill.

ART

Original landscape paintings of your property, farm, favourite view, childhood home or special place. Acrylic on canvas, various size and framing options available.
